

Dr Camilo Calderon

Applied Economist | Digital Analytics, AI, Econometrics, Energy & Mobility

Leicester, United Kingdom | cc907@cam.ac.uk | [LinkedIn](#) | [GitHub](#)

PROFILE

Applied economist and digital analytics builder with 15+ years of experience across macroeconomic modelling, financial analysis, higher-education leadership and international investment. Builds reproducible analytical workflows in R and Python, applies econometric and AI-assisted methods, and translates complex evidence into clear operating and investment decisions. Current work spans digital resilience, energy and mobility, responsible AI, productivity, ESG and strategic decision support.

SELECTED DIGITAL & ANALYTICAL WORK

Cyber Macro Impact Pilot - Public reproducible analytics

Country-year prototype testing how cyber readiness and incident intensity relate to productivity, employment, investment and GDP growth. Built as a traceable R/Quarto pipeline with harmonisation logs, fixed-effects models, robustness tests and an executive narrative. [Live report](#) | [Repository](#).

ScriptGradeAgent - Private responsible-AI prototype

Local-first assessment workflow that applies marking documents, structures evidence and supports human review. Designed for privacy, auditability, model comparison and cross-assessment robustness.

ESG & Financial Performance in REITs - Empirical research

Study of ESG scores, risk-adjusted returns and portfolio optimisation, examining trade-offs between sustainability signals and financial performance.

EV & Autonomous Mobility Research - Methods leadership

Research supervision and methods guidance across spatial EV-charging analysis and autonomous-vehicle policy, including spatial data, socioeconomic indicators, policy transfer and urban adoption questions.

CORE CAPABILITIES

Model	Panel data, PMG/ARDL, fixed and random effects, GARCH, time series, Bayesian methods, growth accounting and scenario analysis.
Build	R, Python, SQL, Quarto/RMarkdown, Jupyter, Git, Excel/VBA and Tableau for reproducible analytics and documented delivery.
Interpret	World Bank, IMF, OECD, Eurostat, Bloomberg, LSEG/Refinitiv, Morningstar, FT and ONS sources.
Communicate	Executive briefs, methodology notes, policy analysis, peer-reviewed research, teaching and stakeholder-ready visual narratives.

TARGET CONTRIBUTION AREAS

- Business and data analytics: performance drivers, forecasting, KPI design, decision dashboards and executive insight.
- Energy and investment strategy: business cases, risk-adjusted returns, scenario testing and externality analysis.
- Mobility insights: EV adoption, charging access, spatial evidence, socioeconomic context and policy transfer.
- Digital risk and responsible AI: traceable AI-assisted workflows, model evaluation, cyber resilience and governance.

PROFESSIONAL EXPERIENCE

Senior Lecturer, Programme Leader & Economics Lead - De Montfort University

2016 - Present

Applied economics research, digital capability building and programme leadership.

- Leads and supervises macroeconomic, financial-econometric, ESG-risk and platform-governance work using global institutional and market datasets.
- Co-designed a school-wide plan embedding R, Python, Tableau and live market-data workflows across programmes serving 1,000+ students.
- Leads capability building in Bloomberg, econometrics and analytics for 60+ academic colleagues and 600+ students annually.
- Translated technical evidence into an investment case supporting an approximately GBP 800k GPU compute cluster and Bloomberg-suite upgrade.

Senior Teaching Associate in Land Economy - University of Cambridge

2016 - Present

Quantitative research supervision across econometrics, applied macroeconomics, real-estate finance and environmental economics.

- Supervises MPhil research and mentors dissertation work across planning, finance, sustainability, mobility and global-affairs questions.

Lecturer & PhD Researcher - Bournemouth University

2011 - 2016

Modelled FX market microstructure and financial risk using high-frequency global financial data.

- Applied GARCH-family and Pooled Mean Group econometric methods; taught macroeconomics and econometrics at undergraduate and postgraduate levels.

Director of Finance, Real Estate & Law - REIT, Bogota, Colombia

2004 - 2010

Led financial strategy and risk management for international real-estate investments exceeding USD 10m.

EDUCATION

PhD in Financial Economics - Bournemouth University, UK

2011 - 2016

Master in Administration (Meritorious Distinction) - National University of Colombia

2007 - 2009

PG Diploma in Finance (Merit) - Universidad del Rosario

2010 - 2011

PG Diploma in Capital Markets (Merit) - Universidad del Rosario

2010 - 2011

BSc in Business Administration - National University of Colombia

1995 - 2001

SELECTED RESEARCH & PUBLICATIONS

- Okafor, G. & Calderon, C. (2022). Empirical evidence of the relationship between terrorism and firm financial performance in Nigeria. International Journal of Emerging Markets.
- Algorithmic Governance in Real-Time ESG Analytics - empirical study integrating machine-learning explainability with financial regulation (revise and resubmit).
- ESG and Financial Performance in the REITs Sector - working paper.
- Applied macroeconomics and economics-analytics textbook manuscripts.

ADDITIONAL VALUE

Languages: English and Spanish. Working style: first-principles problem framing, reproducible delivery, transparent assumptions and executive-ready communication.
